

Saudi Archidon

About Us

We are pleased to introduce Saudi Archidon company in Engineering, Fabrication, Integration, Contracting and Maintenance intended for Oil & Gas, Petrochemicals, Fertilizers, Power Generation & Water Desalination located in Jubail, Eastern Province, Kingdom of Saudi Arabia.

Saudi Archidon company is a World-class business initiative by a team of experienced professional, based in Jubail, Eastern Region of Saudi Arabia, It sets its self on voyage of great customer service and satisfaction. It aims to provide a world-class industrial experience to its clients from the Kingdom of Saudi Arabia and all over the world. Saudi Archidon is growing to become one of the largest and most well-known Engineering and constructions firms in Saudi Arabia.

Saudi Archidon Departments are equipped with up to date software & hardware. It's production facilities include state-of-the-art equipment & machineries with highly skilled & dedicated man power, complying with quality, safety and reliability across its wide range of products and solutions, makes us an industry leader.

Saudi Archidon has a plethora of various sources and a proven record for bringing the best results on schedule and within budget as an architecture and construction leader through its operational entities. Saudi Archidon's scale and experience give our customers and partners the stability, dependability, and know-how they expect — as well as the adaptability and overall maximum benefit they deserve. The Saudi Archidon's compliance program's overarching purpose is to support the Firm in meeting key regulatory requirements that pertain to the company's operating model

Mission

To provide high quality, safety and reliability for wide range of products & services through our highly skilled & dedicated employees and State-Of-The-Art Production Facility

Our philosophy is putting our trust in our employees and our valued customers have proven to be the cornerstone of our success. Our clients' mutual trust has resulted in the delivery of excellent services and the attainment of entire solutions. On behalf of the Saudi Archidon Company, we'd like to express our gratitude for their continued trust in our abilities. We pledge to keep delivering quality solutions while exceeding our goals.

Vision

To become the top construction company by continually producing projects that exceed global standards and provide outstanding customer service.

To consistently provide outstanding value and innovative building solutions to our consumers.

Saudi Archidon Company anticipates being the preferred choice at all times, both nationally and internationally, for their known excellence, quality, performance, and dependability in all types of structures, using current concepts and sophisticated technology.

Values

Our values are our principles, which are more than just words to us; they're how we try to live each day. They set the bar for how we do business ethically and sustainably, allowing us to be a trustworthy friend to our clients. Our ideals are brought to life through Archidon's values.

Our Values specify how we should behave in relationships with coworkers, customers, societies, and other stakeholders. It gives Saudi Archidon's workers practical advice on how to live according to our values, particularly Act Ethically and

Quality Policy

For Saudi Archidon, the customers (without considering the size of their project) are of utmost priority. That is why we deliver a detailed note on how we are going to accomplish the project's objectives. Our quality assurance tactics offer complete confidence and satisfaction.

Goal-Oriented Performance

Our performance is utterly goal-oriented & customer-dedicated. That is why we progress in such a way to offer quality deliverables.

Customer-Centric

Our set of services revolves around our respected customers and their needs. We establish such a plan that completely resonates with clients' needs and requirements.

Management

General Manager Message

Saudi Archidon has made significant investments in its staff. Our employees and clients are the foundation and soul of our company. We have accomplished numerous difficult projects, including high-rise structures, perplexing chemical projects, residential projects, and power plants, by working together in a highly productive environment

Services

Since the start, Saudi Archidon's founding mission has been industrial development. We have been capable of supporting our customer's infrastructure with greater flexibility and efficiency than ever before thanks to this mission as well as the steady expansion of our manufacturing sites. Saudi Archidon is capable of giving our clients highly effective projects by following strict industrial safety regulations, rigorous quality procedures, and comprehensive control and planning plans. Saudi Archidon provides mechanical, structural, and civil construction to the petrochemical, housing, industrial plants, power plants, chemical plants, pipeline, and downstream industries.

Petro-Chemical Plant

Saudi Archidon has been instrumental in assisting nations with the establishment of their oil and gas infrastructure ever since the beginning.

Saudi Archidon's competence in process capacity additions stems from its pipeline competence and close ties to the petroleum industry. Archidon has worked on fertilizer plants, gas-oil separation plants, pumping and compressor stations, production facilities, oil terminals, refineries, general gas treatment, catalytic reforming departments, and ammonia gas sweetening plants as a result of these connections.

Power Plant

The world is experiencing a diversity of power sources and production methods that are constantly evolving.

Saudi Archidon has an outstanding set of skills in Power industry. Archidon has experience with a variety of plants, covering gas as well as steam production on an efficient or combined cycles basis, as well as the implementation of balancing of plants and necessary utilities and infrastructure.

Water And Sewage Treatment Plant

Saudi Archidon has extensive expertise with businesses and the public sector organizations in Africa and the Middle East in developing and implementing water and utility plans. Saudi Archidon provides a comprehensive and adaptable range of design and installation solutions for industrial operations.

Other Industrial Plant

Clients both from the private and public sectors may rely on the Saudi Archidon radical approach and excellent engineering talents, regardless of their area of expertise - industrial, commercial, or military. Saudi Archidon analyses its tactics periodically to maintain cost-effective, high-quality, and environmentally friendly responses to customer needs.

Commercial Building

A strong infrastructure is the foundation of any successful economy. The sector has seen enormous expansion in the Middle East over the years, particularly in the last generation. This sector is still important in Saudi Arabia, especially for rural and distant communities.

Housing Project

Saudi Archidon has been developing its experience to know in the sector of house building since its beginnings. Speedy and safe recovery is always the main goal, whether it's through program management or direct building.

Maintenance Project

Saudi Archidon achieves good operation & maintenance expenses by creating customized solutions and deploying skilled staff. In reality, when working on construction works, a team of high engineers directs design efforts toward creating an ergonomic design that is easier to run and maintain.

Telecommunication Project

Inside plant (ISP) and Outside Plant (OSP) engineering and communications design for mission-critical and high bandwidth infrastructures such as fiber backhaul, FTTx, enterprise, fiber-to-data centers, and campus systems are provided by Archidon.

We pay the same kind of care and attention to almost every aspect of our work, whether it's designing the foundation and construction of a cell tower or the lighting and plumbing systems of an office building. Through site acquisition as well as licensing through last-mile fiber design, we are indeed a single point of contact.

Networking & Transportation Services

During its centuries of operation, Saudi Archidon has maintained a strong presence in this industry. Indeed, the company has been involved in numerous important infrastructure and civil advancements. Whether it's roadways, buildings, ports, contaminated water, or network infrastructures, Saudi Archidon has completed a lengthy number of projects that have upgraded its stakeholders' infrastructure and services.
